Wines of origin Paarl, South Africa

MYBURGH BROS. CINSULT 2019

“Our great-grandfather and his brother combined their resources and talents in many farming endeavours, including wine. Back then, in the early 1900’s, winemaking was very traditional and devoid of the additives and manipulations that are so prevalent these days. We’re sticking to these old-fashioned winemaking practices and trying to make wines that are simple, pure and honest.

Cinsault, known then as Hermitage or Hermityk, was one of the wines they made. In fact, they won the 2nd prize for “the best 10 leaguers of Hermitage” at the Western Cape Board of Horticulture Wine Show in 1904.”

~Tyrrel & Philip Myburgh

Tasting notes: *Aromas and flavours of plums, cherries and strawberries. Refreshing and aromatic medium to light bodied red.*

Vineyards: *The 2019 vintage was characterised by a warm and dry growing season (the 4th in a row). Although the low soil-moisture levels led to some stress, the vines were very healthy in terms of diseases and pests, and the grapes ripened easily.*

• 100% Cinsault from Klipdam farm (next door to Joostenberg): 22 year old, dry-farmed, bush vine vineyard planted in finely textured, decomposed granite.

Winemaking: *Grapes were partially de-stemmed (66%) and the remainder fermented as whole-bunches. Wild yeast fermentation took place in open-fermenters. Macerations were relatively short (4-6 days) and the resulting wine was transferred to old barrels straight after pressing. Bottling took place after a 9 month maturation period. No additives apart from a small amount of Sulphur were used.*

Analysis: *Alcohol: 13% • Residual Sugar: 1.5g/L • pH: 3.49 • Total Acid: 4.9g/L*
